DESCRIPTORS: Structures, *Buildings, Construction,
Floors, Hoists, *Civil engineering

The invention is a process for erecting a building (or
a building section) of several stories, the floorings
prepared on the ground being preferably capable of
running continuously on several supports (columns
and/or walls) and having a surface corresponding to a
plan cross section of the building or of a portion of the
building, or to a large part of such cross section, and

THE CAUSES OF ERRORS IN DIRECTION FINDING.
[1963] [21 p. (tables omitted).
Order from SLA \$2.60 63-14432

Trans. of [Hochfrequenztechnik und Elektroakustik
(Germany) 1923, v. 21, p. 77-100].

DESCRIPTORS: *Direction finding, *Errors, Loop
antennas, Direction finding signals, Mathematical
analysis.

The directional properties of a loop antenna under the
simultaneous effect of two wave beams of the same fre-
quency but different direction, strength and phase is
mathematically analyzed. The results of this investiga-
tion show how the observed errors in bearings, and
poor minimum can be easily explained entirely on the
basis of the simultaneous influence of two waves coming
by different paths from the same transmitter. (Author)
